

BioClean Fusion™

POLYCHLOROPRENE CLEANROOM GLOVES

BFAP
Master Code

BioClean Fusion™ was designed and manufactured as a robust but lightweight cleanroom glove where grip and tactility are paramount. It is Latex-free but has the fit and feel of latex. It is bulk packed with 100 pieces per double bag to meet the needs of cleanroom users.

Suitable for use in ISO Class 5 environments and for the handling of cytotoxic drugs, it is designed to maximise tactility and improve dexterity in use. This product offers an alternative to latex gloves. These gloves are 100% latex free, eliminating allergy problems normally associated with natural latex proteins.

These gloves have a beaded cuff for added strength, easier donning and a secure fit on the arm and are 300mm (12") length for added protection in the cuff area. They are textured for improved grip and tactility and exceed the requirements of EN 455 parts 1, 2 & 3.
